\*Household

<sup>1</sup> The estimated U.S. median income for 4-person families is \$94,738 for the period of October 1, 2021 through September 30, 2022.

<sup>2</sup> Prepared by the U.S. Census Bureau, U.S. Department of Commerce (Census Bureau) from the 2015 through 2019 American Community Surveys (ACS). For further information, see table B19119 for the five-year estimates of the 2015 ACS through 2019 ACS at [data.census.gov](https://data.census.gov) or contact the Census Bureau's Social, Economic and Housing Statistics Division (SEHSD) at (301) 763-3243.

<sup>3</sup> Prepared by the Administration for Children and Families, Office of Community Services, Division of Energy Assistance. In accordance with 45 CFR 96.85, 60 percent of each State's estimated median income for a four-person family is multiplied by the following percentages to adjust for household size for LIHEAP: 52 percent for one person, 68 percent for two persons, 84 percent for three persons, 100 percent for four persons, 116 percent for five persons, and 132 percent for six persons. For each additional household member above six persons, add three percentage points to the percentage for a six-person household (132 percent), and multiply the new percentage by 60 percent of the State's estimated median income for a four-person household.
