# Individual and Family Level Services

## Module 3

The reporting time frames for all information in the individual and family level module are based on the **federal fiscal year (FY)**, which runs from October 1 of a given calendar year until September 30 of the following calendar year.

The data collected in this module relates to **Goal 1: Individuals and families with low incomes are stable and achieve economic security.**

**Section A: Individual and Family Services** provides information on the work CSBG eligible entities did to help individuals and families achieve the outcomes listed in Section B. This standardized Individual and Family Services list will aid in analysis of the relationship between individuals, services, and outcomes.

**Section B: Individual and Family NPIs** is comprised of indicators to report outcomes that fall under National Goal 1: Individuals and families with low incomes are stable and achieve economic security. The indicators are the vehicle by which CSBG eligible entities measure and report the outcomes they have achieved for individuals and families. All Individual and Family NPIs are optional.

**Section C: All-Characteristics Report** collects data on all individuals and households, whether funded directly by CSBG. This demographic information strengthens the CSBG Annual Report by demonstrating who is being served by CSBG eligible entities.

# Community Level – Module 4

**Section A: Community Initiative Status** is where CSBG eligible entities identify initiatives intended to achieve community level outcomes. This form provides a central place to report valuable information about a single community initiative that started, continued, or ended during the current reporting period. The information reported on the status form will be selected via a dropdown menu.

**Section B: Community NPIs Data** provides an opportunity for CSBG eligible entities to enter data for the community level outcomes reported in Section A, Line 14. Entities may select from the indicators outlined in this section or create their own indicator if none of the provided indicators capture what the CSBG eligible entity is trying to achieve. To facilitate the reporting, use, and learning from Community NPIs, the Annual Report provides two types of indicators (Counts of Change and Rates of Change).

The first way to report impact is the Counts of Change indicators. These are basic measures that provide the number of units being measured, e.g., jobs, houses, resources, etc. that have been added (created) or subtracted (eliminated), and in some cases maintained, in the community the CSBG eligible entity has targeted.

The second way to report impact is the Rates of Change indicators. While requiring a bit more information, these indicators tell the full story of the magnitude of the impact a community initiative (usually involving multiple organizations) has had in a community.

**Section C: Community Strategies List** provides a basic identification of strategies, arranged by domain and by topic area. The list cannot be all-inclusive; as such, an “other” category is included. This standardized list will aid in local and state analysis of the relationship between community-level strategies and outcomes.
