¹ The estimated U.S. median income for 4-person families is \$98,487 for the period of October 1, 2022 through September 30, 2023.

² Prepared by the U.S. Census Bureau, U.S. Department of Commerce (Census Bureau) from the 2016 through 2020 American Community Surveys (ACS). For further information, see table B19119 for the five-year estimates of the 2016 ACS through 2020 ACS at data.census.gov or contact the Census Bureau Customer Help Center at 1-800-923-8282.

³ Prepared by the Administration for Children and Families, Office of Community Services, Division of Energy Assistance. In accordance with 45 CFR 96.85, 60 percent of each State's estimated median income for a four-person family is multiplied by the following percentages to adjust for household size for LIHEAP: 52 percent for one person, 68 percent for two persons, 84 percent for three persons, 100 percent for four persons, 116 percent for five persons, and 132 percent for six persons. For each additional household member above six persons, add three percentage points to the percentage for a six-person household (132 percent), and multiply the new percentage by 60 percent of the State's estimated median income for a four-person household.

⁴ Revised from May 4, 2022 to make the rounding scheme ensure that the final totals equal or fall below the respective unrounded amounts.
